

Successful Device Approvals

December 27, 2011

Summary of Course Content

IRSC General Radiation Safety Training: Instruments Containing Radioactive Sources
Refresher Training

This course is an appropriate review for users of instruments containing radioactive sources or performing manufacturing of instruments containing sealed sources without handling the actual source.

- Prohibition on Eating, Drinking, and Applying Cosmetics
- Reminder on Principles of Radiation Safety (ALARA)
- Pregnant Worker Declarations
- Reporting incidents or lost or stolen sources or devices
- Documenting Surveys
- Wearing Personal Protective Equipment
- Regulations/Workers Rights & Responsibilities
- Any relevant changes to international standards or US state or federal regulations

The course and quizzes can be completed in 0.5-1 hour, depending upon the trainee's familiarity with the subject matter.
