

*Successful Device Approvals*

LIST OF TESTING LABORATORIES  
APRIL 8, 2015

Below is a list of testing companies that test products for compliance to US (ASTM/HPS) and international standards (ISO). Some of these companies may only test x-ray or ionizing radiation generating devices or only devices containing radioactive sources.

It is IRSC's suggestion that you have a clear contract with any company regarding the terms of testing, the standard being tested to, the expected completion date of testing and when you can expect to receive the test report.

If you require assistance developing a testing plan please let us know.

We do not endorse any particular company on this list and it is provided for informational purposes only.
